NEW TECHNOLOGIES IN THE CLASSROOM

Erasmus+ KA1 Training Course in Córdoba (Spain)

www.andalusianteachertraining.com

josecarlos@andalusianteachertraining.com

New technologies

The integration of new technologies in the classroom has ushered in a transformative era in education, enhancing the learning experience for both students and educators. Tools such as interactive whiteboards, tablets, and educational apps provide dynamic and engaging ways to deliver content, making lessons more interactive and visually stimulating.

Virtual and augmented reality bring subjects to life, offering immersive experiences that transcend traditional textbook learning. Online collaboration platforms foster communication and teamwork among students, enabling them to work on projects seamlessly, even from different locations.

Additionally, artificial intelligence applications contribute to personalized learning experiences, adapting content to individual student needs and providing valuable insights for educators.

As technology continues to evolve, its integration into classrooms holds the promise of fostering a more inclusive, interactive, and effective educational environment.

New technology, basic benefits

- **Enhanced Engagement:** Interactive whiteboards, educational apps, and multimedia content capture students' attention and make lessons more engaging, fostering a more interactive and dynamic learning environment.
- **Access to Diverse Resources:** Technology provides access to a wealth of educational resources, including online databases, e-books, simulations, and virtual field trips, enriching the curriculum and offering varied learning materials.
- **Personalized Learning:** Adaptive learning platforms and educational software allow for personalized learning experiences, catering to individual student needs and pacing, promoting a more effective and tailored approach to education.
- **Collaborative Learning Opportunities:** Online collaboration platforms enable students to work together on projects, even from different locations, fostering teamwork, communication skills, and a sense of community within the classroom.
- **Real-world Applications** offer immersive experiences that go beyond traditional textbook learning and provide practical, real-world applications of theoretical concepts.

Course description

This course will enable participants to develop their digital and ICT skills in the teaching process. Thanks to this course, participants will know how to use new communication and information technologies in education and training, both audiovisual and telematic.

The inclusion of ICT in the classroom is an imperative for all schools and is a challenge for all teachers at both pedagogical and managerial levels.

However, it is also a great opportunity not only because it is a powerful teaching tool, but also because of its potential to build new forms of communication and relationships among students and a new perspective of inclusion and equality in the classroom.

Learning outcomes

- To learn about the applications of new technologies in training.
- To apply video as an educational medium.
- To know the didactic applications of computers.
- To learn about communication networks
- To analyse the strong impact that Information and Communication Technologies (ICT) have on today's educational world.

Details

- One week course
- Starting from 480€ (Cultural activities included) *
- Min. 4 - max. 14 participants
- Certificate of attendance included (80% of attendance required)
- Available in Córdoba
- Also available in Spanish

* A 60 € late registration fee will be applied if you register less than 8 weeks before the course start date.

Tentative schedule

Day 1. Course introduction

- CHECK IN. Emotions, expectations and focus
- Social Media, information and Communication technologies in education
- Contributions of new technologies applied to education

Day 2. Video in education

- Functions of video in education
- Advantages and disadvantages of video in education

Day 3. WebQuest

- The origin of WebQuests
- Examples and types of webquest
- Practical activities related to the content

Day 4. Google Classroom

- Classroom features
- Advantages of using Google Classroom as a Teacher
- Practical activities related to the content

Day 5. Social media

- Most important social networks and their use in education
- Advantages and disadvantages of their use
- Practical activities related to the content

This schedule describes likely activities but may differ significantly based on the requests of the participants, and the trainer delivering the specific session.

Course modifications are subject to the trainer's discretion. If you would like to discuss a specific topic, please indicate it at least 4 weeks in advance.

About the provider

Andalusia Teacher Training is a training company founded in 2018 focused in the attitudinal training and the improvement of human performance. The company works with clients with the aim of increasing their results both in personal or professional areas, developing techniques and strategies in the areas of coaching, Emotional Intelligence, soft skills and Neuro Linguistic Programming (NLP).

Andalusia Teacher Training learns from the experience gained by its staff, professionals with years of background in the fields of training and the development and management of transnational projects in the frame of Erasmus + Program. Andalusia Teacher Training is currently made up of a multidisciplinary team of 8 people, with backgrounds in languages, translation and interpreting, psychology, international relations, pedagogy and communication.

In the field of international projects, the staff has a solid background in the development and implementation of funded projects in the frame of Erasmus+ and in the areas of entrepreneurship, leadership and application of coaching, Emotional Intelligence and soft skills to different fields. In the last five years we have been involved in more than 50 KA2 projects, of which more than 25 have been developed by our staff.

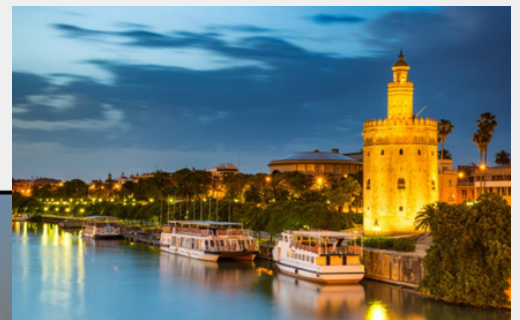

José Antonio Alonso: Has studies in Economics and Psychology. He is Master in Coaching and EI, Master Trainer in NLP (Spanish NLP Association), Expert in Gestalt therapy and Master in Ericksonian hypnosis.

José Carlos León: Coach with a large experience training teams, persons and organizations using EI tools. With a degree in English Philology, he has also been tutor in the Master of Coaching of the University CEU San Pablo and facilitator in the areas of EI and NLP.

Enjoy training... and Andalusia

Obviously, training is a key aspect, but the environment makes the experience complete. That's why Cordoba is the best possible setting, the only city in the world with four World Heritage Sites by UNESCO, a city steeped in history and culture, and also the ideal place to discover Andalusia.

Less than an hour away by train you can enjoy the bewitching Seville, the cosmopolitan Malaga and the haunting Granada, as well as having some of the best beaches just two hours away by car. All in the best connected city in Spain by high-speed train, 1.45 minutes from Madrid and in the centre of Spain's most charming region. Are you going to miss it?

How to get to Córdoba?

Córdoba has no airport, but there are excellent connections to our city from three international airports thanks to the AVE (High Speed Train):

- Madrid. 400 kilometres, 1.45 hours to Córdoba by train.
- Seville. 130 kilometres, 45 minutes to Córdoba by train.
- Málaga. 145 kilometres. 50 minutes to Córdoba by train.

Málaga is the best option, due to the high amount and variety of international destinations and the facilities to link your flight to the train.

Madrid International Airport Adolfo Suárez is the biggest airport in Spain and it has connections with all the important destinations in Europe. Flights use to be cheaper and both the frequency and the options are higher, so it is also a good chance.

Seville is another option, though destinations and frequencies are not the best. Check if it fits your plans.

Train. There are different companies offering connections from and to Madrid, Málaga and Sevilla to Córdoba. The sooner you book, the cheaper!!

- RENFE (www.renfe.es). In trains from and to Seville or Málaga, you will find AVE and AVANT. The service is the same, though this last one is cheaper. It happens the same from Madrid with AVE and ALVIA.
- IRYO. (<https://iryo.eu>). Cheap tickets if booked with months in advance.
- AVLO (<https://avlorenfe.com>). From June 1st 2023. Renfe low cost brand.
